

Operating System & Windows 10

Grade 4 Computer Science

What is an Operating System?

The Big Manager!

- ★ The OS is the most important software on a computer.
- ★ It helps the hardware parts work smoothly with other software.
- ★ **Windows 10** uses a GUI (Graphical User Interface) so we can click pictures to do things!

Features of Windows 10

Attractive

Windows 10 is easy to use and looks great! It uses colorful pictures, themes, and interactive icons.

Start Menu

Found at the bottom-left corner. It gives you super quick access to all your apps and programs.

Cortana

Your digital assistant! You can use your voice to search for information, play music, or set alarms.

Welcome to the Desktop

The First Screen

- ★ When you switch on the computer, Windows loads automatically.
- ★ The very first screen you see is called the **Desktop**.
- ★ The small pictures on it are called **Icons**. Double-click them to open!

Fun "Aero" Features

Aero Peek

Hover your mouse over a program icon on the Taskbar to see a tiny preview of the window without opening it.

Aero Shake

Click and hold a window's title bar, give it a quick shake, and all other windows will hide!

Aero Snap

Drag a window to the left or right edge of your screen, and it will magically snap to fill exactly half the space.

Files and Folders

Files

Information inside a computer is saved as files. Just like you have a name, every file has a unique name to help you find it!

Files can be letters, pictures, songs, or videos.

Folders

A folder is like a digital bag that holds a group of related files to keep them neat and organized.

A folder placed inside another folder is called a **Sub-folder**.

The "This PC" Window

Finding Everything

- ★ Double-click "This PC" on the Desktop to access all connected hard disks and pen drives.
- ★ **Address Bar:** Shows exactly where you are.
- ★ **Search Box:** Type here to find lost files!

 Computer file explorer window cartoon graphic

Using File Explorer

What is it?

File Explorer is a special program that lets you view, search, delete, and organize all files on your computer.

How to Open

Click the Start Button > Windows System > File Explorer.

Shortcut: Press Windows Key + E together!

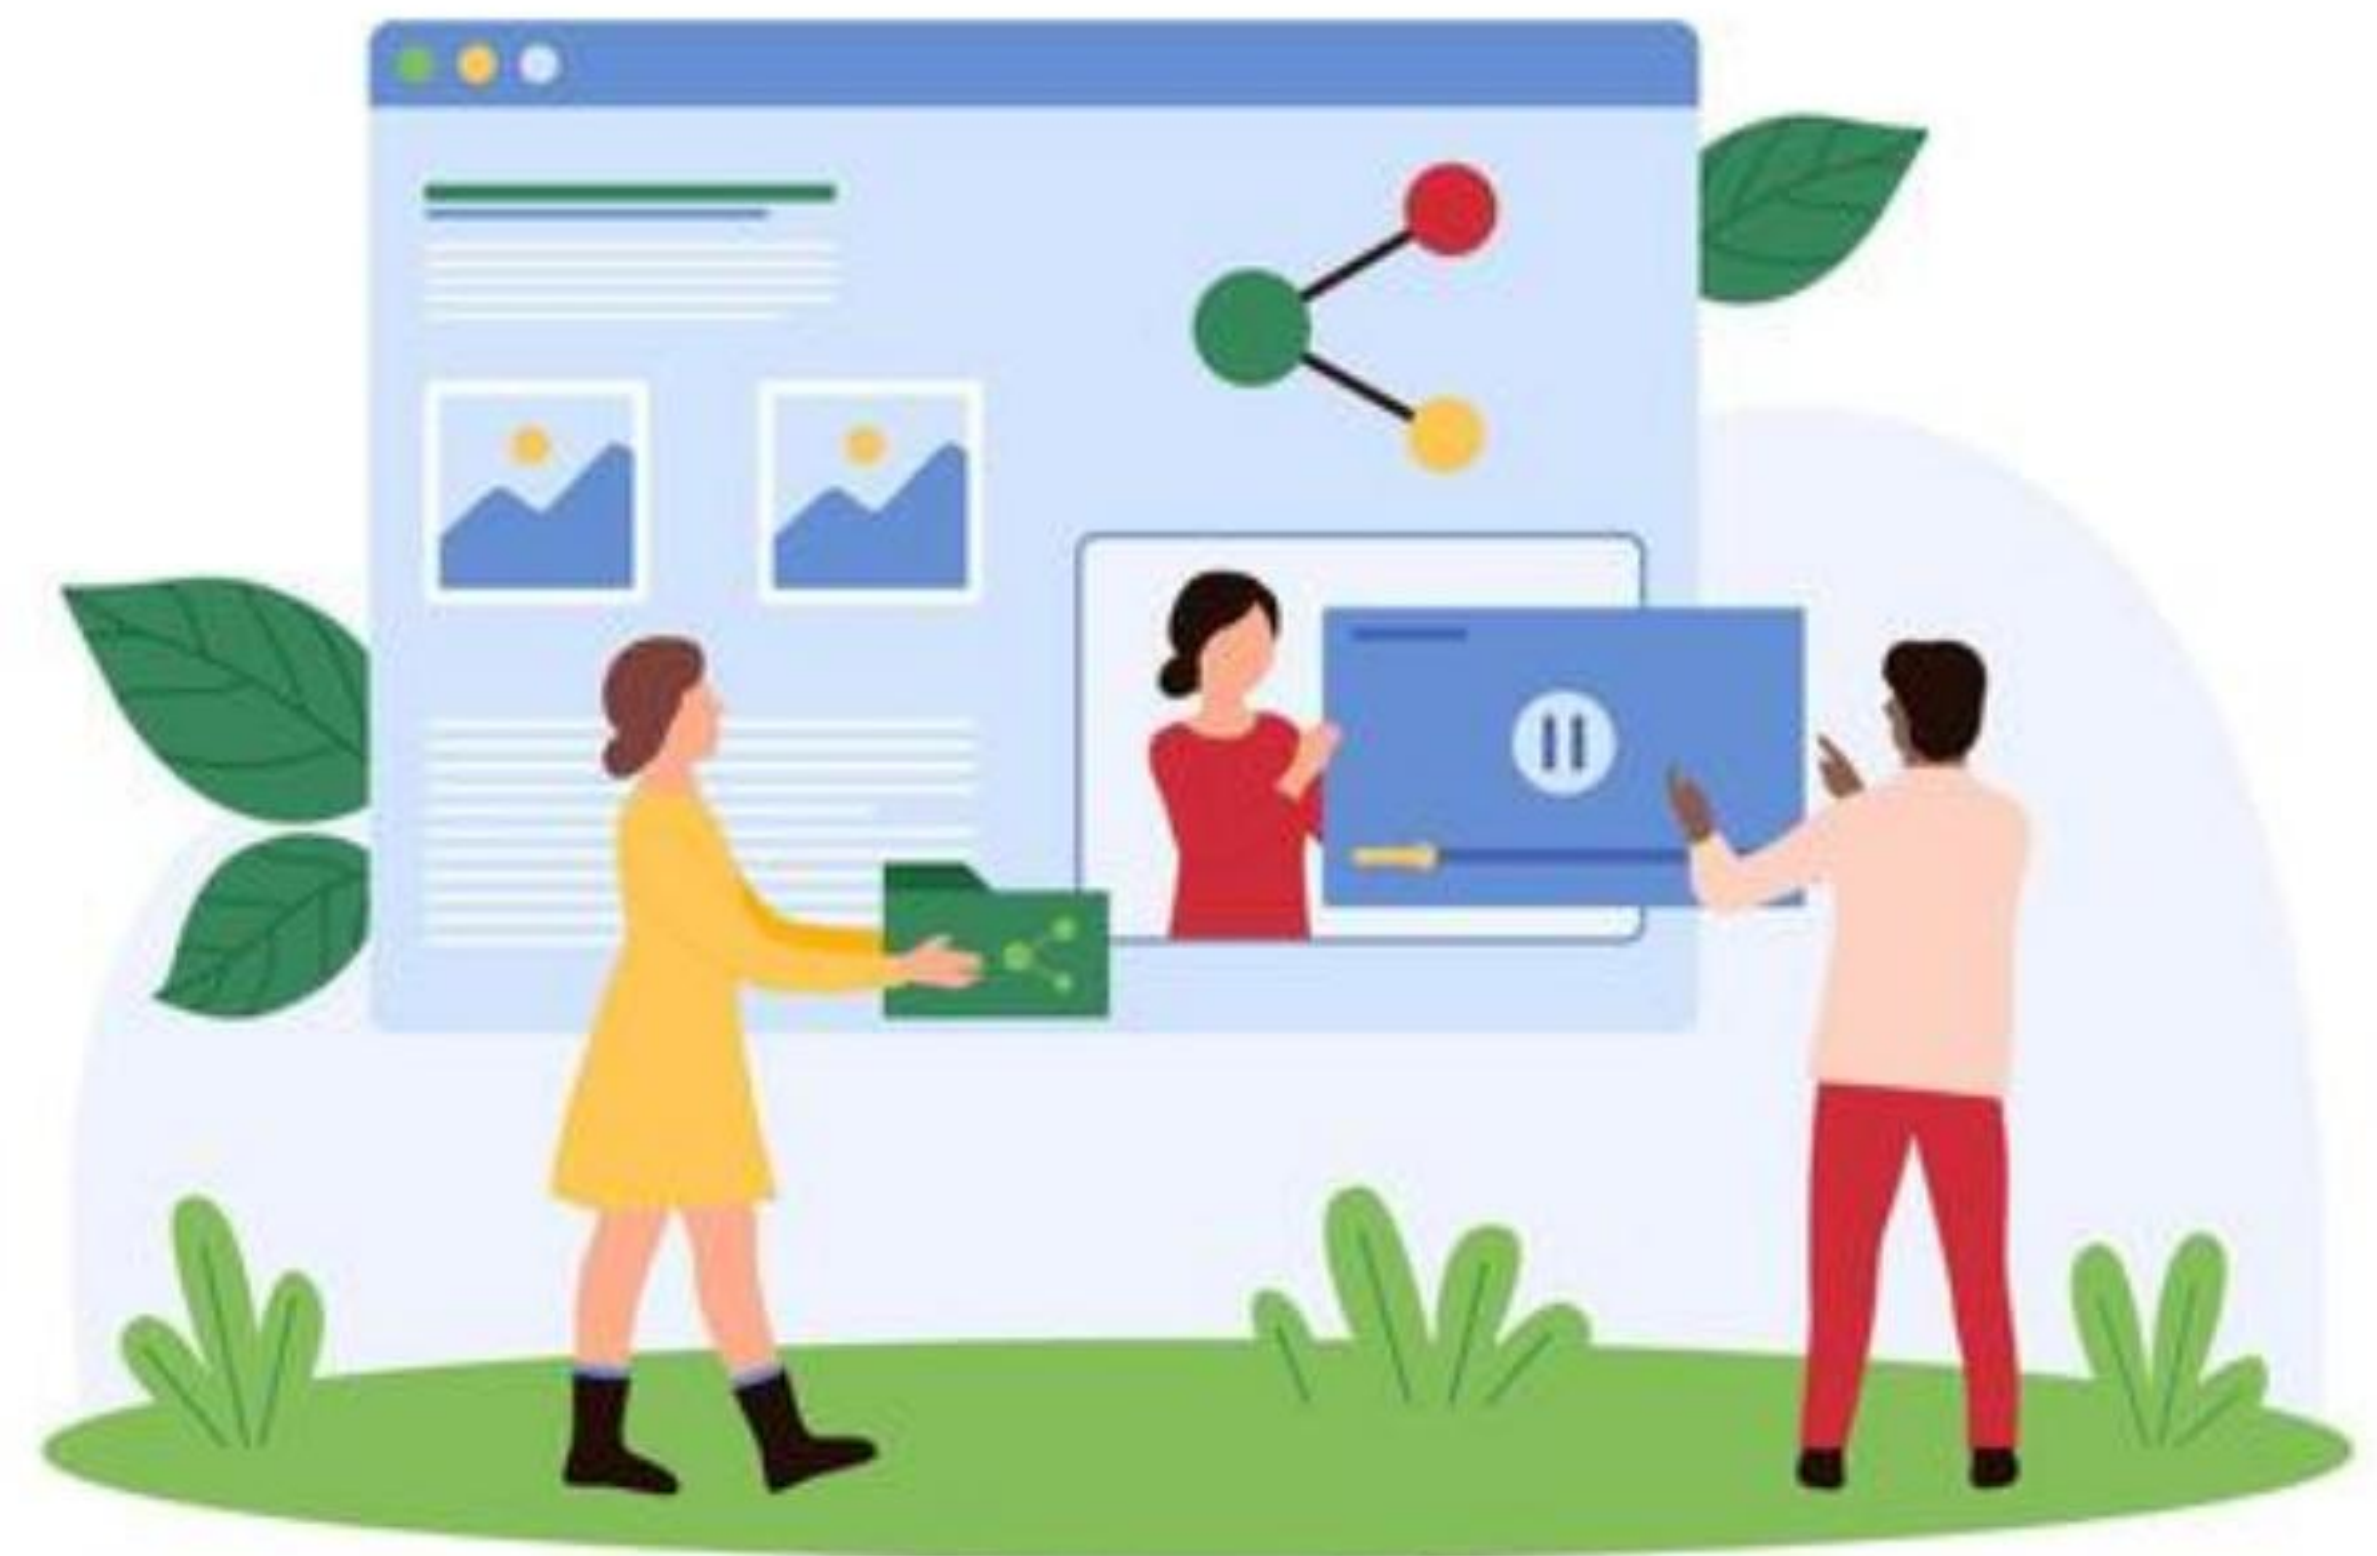

The Panes

The **Left Pane** shows the main locations. The **Right Pane** shows all the contents of the folder you clicked.

Creating Folders & Files

Let's Make a Folder!

- ★ Right-click anywhere in a blank space on the Desktop.
- ★ Move your mouse to **New** in the menu.
- ★ Click on **Folder**.
- ★ Type a cool name and press Enter!

Don't Forget to Save!

Keep Your Work Safe

- ★ When working in an app like MS Word, click **File** then **Save As**.
- ★ Click **Browse** to choose where to put it.
- ★ Type a name in the File Name box.
- ★ Click the **Save** button!

Manage Your Files

Rename

Right-click the file, select **Rename**, type the new name, and press Enter to change it.

Move (Cut & Paste)

Right-click and select **Cut**. Go to the new folder, right-click, and select **Paste**. The file moves completely!

Copy (Copy & Paste)

Right-click and select **Copy**. Go to the new folder, right-click, and select **Paste**. Now you have two copies!

Make it Yours!

Personalize the Desktop

- ★ Right-click the desktop and click **Personalize** to change the wallpaper!
- ★ **Shortcuts:** Drag a program icon from the Start Menu to the Desktop to create a quick shortcut with a tiny arrow.

Quiz Time! (Part 1)

?

Question 1

What is the most important software on a computer that acts like a manager?

Click to reveal answer

?
